98-DOE-03654

FEB 25 1998

Mr. Tim Rehder
Rocky Flats Project Manager
U.S. Environmental Protection Agency
999 18th Street, Suite 500
Denver, Colorado 80202-2466

Dear Mr. Rehder:

The U.S. Department of Energy (DOE) Rocky Flats Field Office is transmitting the *Draft Sampling and Analysis Plan to support the Source Removal at the Trench 1 Site, IHSS 108*, Rev. C. Two copies were already delivered to the Environmental Protection Agency staff, and to the Colorado Department of Public Health and Environment staff on February 19, 1998, for review and approval. Comment response sheets were enclosed with the agencies' copies. This draft has incorporated Kaiser-Hill and DOE comments.

Please note that two Sampling and Analysis Plans (SAP) are being prepared for this project. A SAP is being prepared by the treatment vendor and covers the Waste Acceptance Criteria (WAC) of the receiving treatment facility as well as the WAC sampling requirements of the final disposal facility. The SAP prepared under this transmittal covers excavation/putback requirements established in the Proposed Action Memorandum as well as WAC requirements to facilitate disposal of radiologically contaminated soil/debris destined for offsite disposal.

Comments should be returned to the Rocky Flats Field Office by Friday, February 27, 1998, in order to meet the schedule requirements of the project. If you should have any technical questions related to this transmittal, please contact Norma I. Castaneda at 966-4226 or contact me at 966-4839.

Steven W. Slaten
RFCA Project Coordinator
